Healthcare Without Boundaries, David Lind, Allina

Secure access to any information, anywhere, anytime, using any devices; personalized to meet your needs; enabling exceptional care in our community.

David Lind is the Enterprise Technology Services Director for Allina Hospitals & Clinics. In this role, David is responsible for the strategy, implementation, guidance and management of Allina's technical infrastructure enabling exceptional care in the community. David's teams manage Allina's data center, application hosting and storage systems, enterprise networks and telephony, database administration and personal computing for 11 hospitals and 85 primary care and specialty clinics throughout Minnesota and western Wisconsin.

David is recognized as an industry leader in providing innovated technical solutions and for over 30 years has been providing technical leadership to various organizations representing the healthcare, financial, insurance and manufacturing industries. Prior to his career in Information Technology, David held various leadership positions as a retail Sales and Marketing Manager for a nation-wide retail organization and as an International Credit Manager for a multinational technology firm. David's diverse background and experiences provide him with a unique perspective necessary to meet today's business and technical challenges.

Born and raised in Minnesota, David and his wife Gail currently reside in Prior Lake, MN where they raised their three sons. David has had the privilege of living and working his entire career in Minnesota.
